IN YOUR DESIRED WAY

TAMPINES GREENEDGE

Today, more and more home owners choose to have Open Kitchen Concept with Style for their new houses.

Looking at the pictures, it is just feeling awesome and wonderful to have such creative, amazing kitchen design. Thanks to the Interior Designer who has made his client's 'Dream Kitchen' came true.

With the SLEEK & SLIM OBRO Downdraft Cooker Hood and Induction Hob on the island cabinet, it looks even more elegant, spacious and best place for family to hang around when having meals or cooking.

It can be displayed as 'Showcase Area' when relatives and friends visiting for parties or gathering at home. Its really AWESOME!

PASIR RIS DRIVE

Whether you're thinking of having island cabinet or wall cabinet design, OBRO Downdraft Cooker Hood and Induction Hob has the best fit for all.

It is just only submerge into your kitchen cabinet with the counter top that will provide more working space in kitchen. It offers greater accessibility for easier usage compared to traditional cooker hood.

Also, you are able to look after / keep on eye on your family members while preparing meals over at the kitchen with Open Kitchen Concept (No partition wall between kitchen and living hall with lesser blind spot).

For smaller families that doesn't use kitchen that much, with Open Kitchen Concept design can be used for other functions / purpose such as studying area, to 'resize' kitchen area to smaller space but to 'make' dining and living area become more spacious.

MATILDA COURT PUNGGOL

It is not easy to manage smokes and fumes as they are too light to be handled. OBRO Downdraft Cooker Hood is one of the best system to solve it for you based on the technology, design and suction coverage area that is just right at the side of your cooking stove.

In Singapore, the weather is pretty hot and humid. Just imagine that if you are frying food in an enclosed kitchen, you will be 'trapped' in a sultry and smokey place which makes you feel very irritating and fretful. One of the best design on the air flow outlet will be blowing straight to the service yard.

With Open Kitchen Concept, unlikely you will face this kind of situation. Most of the smokes and fumes can be managed by OBRO Downdraft Cooker Hood and food smell will be distributed away to rest of the area even faster.
